Dear customer,

We are writing to inform you that support for the PD Detector mobile application has ended.

As part of our product lifecycle management, we have concluded all technical assistance, updates, and maintenance for the PD Detector app. While the application may continue to function on your device, IPEC will not be supporting this product going forward. This decision allows IPEC to focus on support for the new PD Detector Pro product line, with continuing features and updates. Your continued partnership is highly valued, and we remain committed to supporting you through our current and future product offerings.

If you have any questions regarding this change or would like guidance on alternative solutions, please contact our support team at sales@ipecuk.com

Thank you for your understanding.

Sincerely,

Carl Eastham
Business development Director
IPEC Ltd
